## 1.12 Employee Health Program

It is important to promote and maintain the safety of other employees, volunteers, patients and visitors of the Good Samaritan Health and Wellness Center. To assist in accomplishing this, all employees shall complete an initial Tuberculin skin test or, if the employee has had a positive Tuberculin skin test in the past, complete a Tuberculosis Symptom Screen (as attached). An initial health assessment form is also required.

Any employee who does not pass the tuberculin screening must receive follow-up treatment at his/her expense. Employment is contingent on acceptable corrective measures that are taken.
