4.12 Use of Tobacco Products

The Center is committed to the promotion of health including the prevention as well as the treatment of disease. Since use of tobacco in any form is recognized as being hazardous to the health of the user as well as those around them, use of the tobacco products by employees or volunteers on clinic property is strictly prohibited.

In addition, employees and volunteers who encounter patients or visitors smoking in any part of the clinic property not specifically designated as a smoking area should politely ask those persons to stop or to move to a designated smoking area. Any refusals should be promptly reported to the Executive Director or authorized designee.
